# ON ARRIVAL

**Les Clés Blanches:**

Les clés Blanches is your one stop shop for anything related to the chalet : from keys to bed linens or fixing anything broken

In case of need dont hesitate to contact Mr Perret ( (given on booking))

**The Chalet :**

To access the chalet, at the roundabout continue straight as to exit the station, 200 metres later turn left following the signs “Hameau de la Tagna”.
You will reach the level of a small building and a parking lot.
Right after, you have a small dirt road that descends on the left and leads you to the chalet.
There are 2 parking places in front of the cottage, you can park on the right space, against the stone wall yet when heavy snowfalls occur it can be difficult to get in/out of the spot, hence why we do not recommend to park there.
However, this area is not cleared, we recommend that you unload the car in front of the chalet and return to park on the parking above in case of snowfall.

**Getting the keys:**

2 sets of keys are available at the "Clés Blanches". We recommend that you call Mr Perret to the (given on booking) when you arrive at Moutiers to agree on the place of appointment which will

be either at the Agency at the entrance to the station, either directly at the chalet.

In case of late arrival please let know us, we have the doors with a digicode that we can unlock and leave the keys inside.

Code to the doors will be given through seperate email.

**Map of La Tania :**

You can find the map of La Tania here:

- https://www.latania.co.uk/resort/MAP/ResortMaps2018/2018LTPLAN.jpg
- The chalet is under the reference N.

# SERVICES

| | |
|---|---|
| **Internet / Phone / TV** | The chalet has a high speed Internet with TV and phone access.<br>Network name: Chalet_Renoir<br>Password: given on arrival<br>Chalet Phone number : given on booking<br><br>The subscription includes free calls to many countries (landline only except for France where mobile phones are also included). If calls are made to non included numbers, the amount will be charged at end of stay.<br>The full list of costs per destination is available here:<br>http://www.free.fr/Freebox/telephone.html |
| **Final clean** | The final cleaning is provided by the "Clés Blanches" concierge. However, you will be asked to leave the kitchen in good conditions (do not leave dirty dishes, empty the refrigerator...). |
| **Useful phone numbers** | Tourism office : +33479084040<br>la Tania doctor – in the building before the gondola : +33479082960 open 7/7 |

# THE LIVING ROOM

## Lighting

In addition to the classic operation by switch, most of the lamps in the living room are controllable by remote control to vary the intensity, etc...
Kitchen lights have motion sensor, so that they will light up automatically when entering the room.

Left is a picture of the standard configuration, bottom switch is the main light switch, top and middle are the radio frequence controller which directly controls the bulbs.
Recommandation is to leave the main switch always on and then control with the controllers. There are little « Auto » stickers that show when the switch is in the correct position.
Middle switch triggers the preset modes (TV and all on) while the top switch enables control on individual lights.
If you have issues with a light not turning on then this is because a main switch most have been accidently turned off.
If issues persist, there may be an issue with the controller, feel free to send me a message and I can typically fix remotely

## The Chimney

Chimney is fully operational
The door slides upwards which enables you to put the wood in place, light it and then clean it. There are two « knobs » on each side of the chimney which will enable you to rais or lower the glass. When cold you can action them directly with the hand,if hot, please use the specific metal handles supplied.

Air inlet is controlled by the little slider shown below. Use the metal handle to move.

Chimney is designed to function closed, yet you can operate it opened. In this case there is no control of air, and wood

tends to burn much faster.
There is a large Karcher vacuum cleaner next to the chimney which you can use to clean the chimney. Please empty and clean filters after every use.
If you want more info, just type STUV 21 on internet.

## The vacuum cleaner

In the living room, a vacuum cleaner robot is available. You will find it against the wall between the table and the sofa. Before starting, we recommend that you make sure that you have left nothing on the ground. Then simply press the 1 button and let him do, he will return alone on its charging base when he completes.
If you want to stop him before, press the 1 button to stop it and then press 2 to return to its base.
After each use, please empty the bin that you can reach by lifting the cover at the level of the mark 3

## The TV

TV is equipped with a « Freebox » (french internet provider TV box)
Unfortunately all menus are in French, still have not found a way to switch them to English.
To start :

- Turn on TV with Philips (black remote control)
- Turn on TV box with Free remote control (gray remote)
- Select Télévision – Freebox TV
- If it doesnt work, check that TV is on HDMI 1 with Philips remote and that the little box circled in blue is set-up to 1 as well
-

- Freebox offers mainly French channels, we are currently in the process of installing a satellite dish (the white box) but unfortunately not working yet. If you have an own IPTV account feel free to use it, just set the box circled in blue on 3 and use the black and orange remote.
- On the freebox, to check when browsing through channels if you see a box on top right of the info panel with VM written, means that program is multilingual. Start watching the show, press the Green button on the Grey remote, scroll down to Langues et sous titres, and select « Version originale ».
- Some english speaking channels are located after number 350.
- To return to the main menu press the « Free » button on the grey remote (red letters)

TV tends to be painful and crash…. You will notice that if, after turning off the TV, the Philipps logo stays on… There is no other alternative than to unplug/replug. To make that operation simple there is a switch under the coffee table (white button) that will remove power and put in back on. Just press it once and TV should be reset

There is an Xbox one available for our guests, a couple of games are available, but our kids so far have limited the number of games we where allowed to leave in the chalet 😊. Remotes are in one of the drawers in the cabinet, they charge over a usb port, some usb

| | |
|---|---|
| | cables are supplied in the cabinet drawer, please be mindful and put them back in there for the following guests. |
| **The terrace** | The terrace is brand new, please let us know if you see any issues with it.<br>We would rather you not use the BBQ in the winter season, as the smoke will tend to stay at low levels due to the temperature.<br>If you have a very strong urge for BBQ please make sure you install the mat under the BBQ. Terrace going on fire due to a not well managed BBQ will be entirely at your responsibility.<br>In summer you can find coal at le Praz or Meribel. |

# THE KITCHEN

**New kitchen has been installed this winter, please let us know if there are any issues/ complications with it, we still have 10 years of warranty 😊**

**The stove**

**To set the clock** simultaneously press buttons 2 and 3 while pressing the keys of change in the value 4 or 5.

For programming refer to the operating instructions attached below from page 27

914776020-FR.pdf

---

**The fridge**

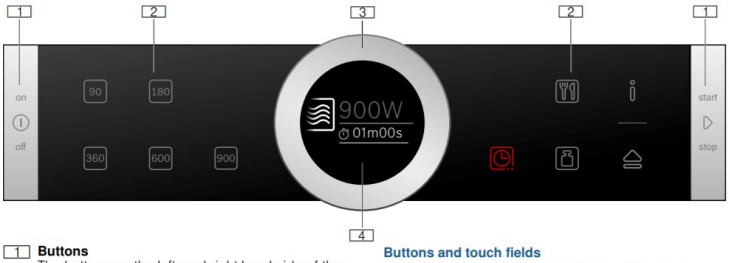

Kitchen is equipped with a large fridge and freezer, there is plenty of room for you to bring your groceries

---

**The microwave**

Microwave is quite simple to operate, just one thing to notice is that the door is opened by the botton on the bottom right.
To operate, just press on (on the left), use to central knob to select time and then press start (on the right)
Full manual can be found here : link

---

1 **Buttons**
The buttons on the left- and right-hand side of the control panel have a pressure point. Press these buttons to activate them.
For appliances that do not have a stainless steel front, these two button touch fields do not have a pressure point.

2 **Touch fields**
There are sensors under the touch fields. Simply touch the respective symbol to select the function.

3 **Rotary selector**
The rotary selector is fitted so that you can turn it indefinitely to the left or right. Press it lightly and move it in the direction required using your finger.

4 **Display**
You can see the current adjustment values, options or notes in the display.

### Controls

The individual controls are adapted for the various functions of your appliance. You can set your appliance simply and directly.

### Buttons and touch fields

Here you can find a short explanation of the various buttons and touch fields.

| Symbol | | Meaning |
|---|---|---|
| **Buttons** | | |
| ⏻ | on/off | Switching the appliance on and off |
| ▷ | start/stop | Starting or stopping an operation |
| **Touch fields** | | |
| 90 | Microwave output | Selects 90 watts |
| 180 | Microwave output | Selects 180 watts |
| 360 | Microwave output | Selects 360 watts |
| 600 | Microwave output | Selects 600 watts |
| 900 | Microwave output | Selects 900 watts |
| | Time-setting options | Select time-setting options |
| | Programmes | Selects a programme |
| | Weight | Selects the weight in the programme |

## The dishwasher

The dishwasher is located in the kitchen, controls are on the top panel.
To turn on, press the program button on the left (we would recommend auto), and then press start on the right. When you close the door, if all went ok, the remaining time should be projected on the floor.

Link to manual

| | |
|---|---|
| **The ham slicer** | Kitchen is equipped with a professional ham slicer, instructions for use are located in the top right drawer of the cabinet at the right of the TV.<br>Please clean it thouroughly after use |
| **The coffee machine** | The kitchen is equipped with a Nespresso machine. If you wish, a filter coffee machine available in the closet of the cabin.<br>The Nespresso compatible capsules are usually not available in La Tania, we recommend you to arrive with your stock or to fill the Super U of Moutiers coming up. |
| **Where to do grocery shopping ?** | The Tania has a small convenience store, the Sherpa who allows to refuel. In winter the convenience store is well-stocked with good meat and cheese. In summer, it is more limited.<br><br>La Boucherie du Praz allows to deliver high quality meat and prepared dishes. The butcher is closed this summer.<br><br>The nearest supermarket is Super U at the exit of Moûtiers on the road to Courchevel. It offers online shopping, convenient to pick up everything on arrival before climbing up to La Tania.<br>http://www.coursesu.com/salinslesthermes/AccueilMagasin/_mag |
| **Gas** | There are two large bottles of gas in the small wooden closet outside the ski room (next to the bench). A selector to switch from one another in case of the first one is empty<br>Currently the left one is in use (started on 3/1/2018) ; right is full<br><br>In case you want to shut the gas to the stove, you have a valve in the cupboard just at the left of the he stove. |

**Draft Beer** 😊

We have a little secret hidden in the kitchen, for your feedback from ski, nothing like a little beer on tap.
The chalet is equipped with a Perfectdraft beer system, as it is impossible to find kegs0 in La Tania, we can provide you with 2 per week for €30 per 6 l keg. Please let us know before if you want to order some so that I can manage inventory.
After use do not throw empty drums, they are returnable, please put them back in the cellar with the full kegs.
The machine is fragile, here is a short video on how to put in place a keg. https://www.YouTube.com/watch?v=rjKUfXb5bol
Alcohol abuse will damage health and potentially your wallet, as any damage will be taken from the deposit.

# ROOM HEATING & LIGHTING

Chalet Heating is managed centrally through our home automation system. For good operation of the system, please leave all heaters on “prog” with the dial on 4 or 5. If the automatic system fails you can always go back to manual control by setting the dial on each individual heater to comf, and adjusting the setpoint.
Automated room control is done through the little screens by the top of the beds in each room. Photo on the right is the one from the Squirrel room (Chambre Ecureuil). Just adjust the set point (consigne) to the desired temperature for the room. “T actuelle”is current room temperature for that room.

**Room temp control**

On the same screen you can as well turn on and off bathroom air ventilation. Ventilation is set to work from 8AM to 10PM. If you for example want to take a shower after 10 pm then you can just turn on ventilation from here.
If you find the 8am to 10 PM time for ventilation not suitable for you just let me know, at this point in time this can only be done with administrator rights.

For the living room, change of temperature setpoint can only be done through the master controller in the basement. See troubleshooting section.

---

**Room lighting control**

If you press Lumieres (lights) and the first page, you will arrive at the second page which controls the bedroom lights. This page is still experimental and not fully reliable, however the good old switches still work perfectly when you need them.

---

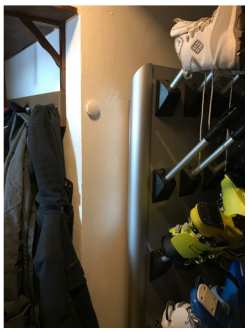

‘Chevets’ are the bedside lamps. Cadre is the animal frame above the bed.
Color and intensity bar control the animal frame.

| | |
|---|---|
| **Hallway automatic lighting** | If you are bothered by the automatic lighting in the hallways, there is a very simple solution, the IR detectors are magnetic and can be easily removed and stored in a drawer for the duration of your stay. Just grab the golf ball and hide it away. Just remember to put them back as you leave for the next guests. |

# SKIROOM AND CELLAR

**Ski boot dryer**

Ski room is equipped with a ski boot dryer, the switch at the left of the drier controls it.
One press on the left button turns it on for 90 minutes, ideal if you are coming back to the chalet for lunch. On top of that it is configured to work automatically from 8 :00 to 10 :00 AM.

In order to avoid smells linked to long days of exercise in the skiroom we have equipped the room with an ozone sanitizer. This is controlled by the right button of the switch.
Just a warning, ozone is a lung irritant if you breath it directly. Hence we recommend to not enter the skiroom in the 30 minutes after starting sanitization. The sanitization will only start 2 minutes after you press the button to let you leave the room.

---

**Ski room External lighting**

Ski room and external lighting are automatic.
There are two motion detectors, one inside the ski room, the other just outside on the gas bottle shed. Passing by one of them will light the ski room, if it is dark it will also light the external lights.
There are two manual switches inside the ski room that can override the automatic controls.

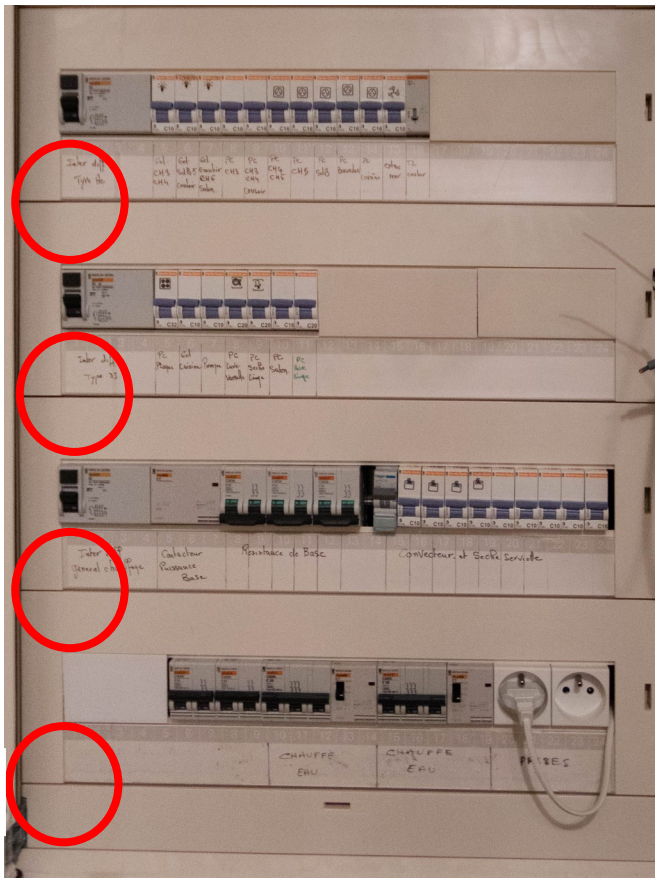

---

# THE SURROUNDINGS

| | |
|---|---|
| **Roof snow shedding** | Please be careful on the sourroundings of the chalet that are below a roof.<br>If it is loaded with snow, it may clear at any given moment, especially if weather is warm.<br>Please pay particular attention when using external stairs as it is located below the roof.<br>That can be quite a few kilos of snow/ice coming down at once. |

# ELECTRICITY

| | |
|---|---|
| **At your arrival** | Someone will have passed before your arrival to ensure that electricity has been turned on.<br>However if you notice a problem, fuse box is located in the equipment room at the back of the ski room (with the boilers). |
| **At your departure** | Unless explicitely asked by me, there is nothing to do at your departure. However, if you are asked to cut electricity to your departure, please cut the level of differential switches 1,2 and 3 as well as the 2 water boilers.<br>Do not cut switch 5 which corresponds to the heating. |

# IN CASE OF PROBLEMS

**Water leak**

The main water header is located in the boiler room at the back of the ski room. To close the water simply turn the tap quarter turn located at Mark 1 on the picture below.
Then call me at the +33 6 43 46 03 99 as well as the « Clefs Blanches » in the (given on booking).

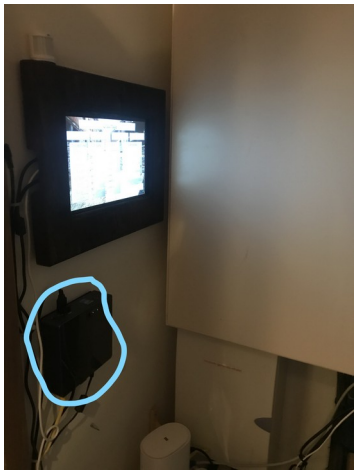

---

**Fire**

There is a small fire extinguisher in the kitchen and a fire blanket

---

**Heating / lighting / other automation issues**

If there has been a power failure/ blackout / etc... and if you need to have all the automation working you will need to restart the homer server
Server is located in the boiler room, just below the control screen. If power and wifi leds are down then just restart pressing the power button.
The screen will ask for a password, given on arrival.
Then just press the jeedom icon on the screen and you should have the main screen of the home automation system.
From there you have access to everything, from external lighting to heating etc...
For example to change the setpoint of the living room. Just navigate to salon

And from there you can change the setpoint (consigne).

# THE SKI

| | |
|---|---|
| **Ski passes** | You can buy your ski passes online here : http://www.skipasscourchevel.com/fr/<br><br>Otherwise the passes can be bought at the office located by the gondola. |
| **Ski/Boot rentals** | Many equipment renters are located in La Tania. We wouldrecommend Skiset for their choice and their capability to maintain the skis.<br>You can book online at the following address : http://www.skiset.com/ |
| **The runs** | The best slopes in the world wait at your doorstep. You can find all of the infos on open, groomed, etc.. runs on www.s3v.com . I highly recommend looking for the piste of the day ! |
| **Ski in / ski out** | When there is enough snow (95% of the time in Feb/march) you can ski in back to the chalet.<br>The is a special trick to find theway : here is link to the video.<br>https://www.facebook.com/chalet.renoir/videos/1686602348057475/ |

# THE RESTAURANTS

Here is some advice for your enjoyment during the stay. No need to go to overpriced Courchevel to enjoy fine dining. According to Tripadvisor La Tania has some of the best tables of the valley (n 1 and 2 as I write these lines).

| | |
|---|---|
| **Le Farçon**<br>The michelin star restaurant in La Tania.<br>For special occasions | According to Tripadvisor one of the best table in the whole Courchevel valley, and one of my favorite places wherever.<br>You can find the menu here. It changes regularly so take a look at it at the last minute. |
| **Les Chanterelles** | For everyday dinning and local specialties . Good value for money.<br>http://www.laferme.latania.fr/fr |
| **Le Bouc Blanc**<br>Restaurant d'altitude at the gondola summit | Yes, according to Tripadvisor, la Tania hosts two of the three best restaurants of the Courchevel valley (out of 108) ! The Bouc Blanc is a different style from the Farcon, but as pleasant. Even if you are not a skier, taking the gondola up to the restaurant is well worth the trip ! And in summer the gondola is free ! |

List is not exhaustive, please dont hesitate to give me any feedback on local restaurants so that I keep this list evergreen.

# ACTIVITIES

| | |
|---|---|
| **La Tania tourism office** | The tourism office of la Tania is immediately left on the footpath to the centre of the resort (hard to Miss). It will provide you with all the necessary information to keep you entertained.<br>At the same time, the tourist office serves as post office for La Tania.<br>Do not hesitate, before arriving to visit the websites of offices:<br>www.Courchevel.com |
| **Swimming** | In summer, La Tania has its own swimming pool in the Center station, courses are offered and it is open to the public the afternoon.<br>For something bigger and more extraordinary try Aquamotion in Courchevel. To access back to the Praz and after the ski jumps, turn right to climb to Courchevel. You can't miss it.<br>https://www.aquamotion-Courchevel.com/FR/ |
| **Horse riding**<br>**Summer only** | **Summer only -** For horse lovers please visit Amandine and Pauline in the equestrian center.<br>The equestrian center is located on the road to the 3 minutes of La Tania Praz<br>http://www.centreequestrecourchevel.com/ |
| **Ice skating** | At Courchevel 1850 you can find a beautiful ice skating rink. For the days when you are not in the mood for skiing. Or for after ski family fun.<br>http://www.patinoirecourchevel.com/ |

| | |
|---|---|
| **Getting around** | If you want to get around without using the car, Courchevel offers a free shuttle service that connect all levels of the station. Schedules are here .<br>A little tip, if you want to climb to Courchevel 1850, you can also walk to Praz by the forest path (~ 2 km) and then take the gondola that will get to the centre of Courchevel 1850 |
